
Stage 1: Collection
Keyword-based search of TikTok
cafes, bookstores, museums, parks, markets
(Chinese and English terms)
Harvest of public metadata
28 May 2025
23,101 records
Stage 2: Cleaning
De-duplication by video ID
23,010 unique videos
Excluded: n = 91
duplicate records
Validity screening
22,924 videos
Excluded: n = 86
invalid posting date (1)
zero duration (84)
zero plays (1)
Analytic sample: N = 22,924 videos
Stage 3: Feature construction
Cue families from platform fields (no video-frame processing)
narrative: semantic richness, caption length, duration | sensory: on-screen text, quality, framing
guidance: hashtags, location tag, ad label | controls | log1p and z-standardisation
Stage 4: Analysis
Study 1
NB2 funnel models
exposure, like, save conversion
Study 2
Decoupling tests
exposure vs. conversion;
affective vs. instrumental
Study 3
Complementarity, fsQCA
combinations of cues;
permutation placebo
